

Emily Sigma Straw Blower

£POA

Especially designed for telescopic handler, the Sigma straw blower can spread round or square bales up to 18 meters. Time saving: no cutting oblivion, no tool loss (knife, cutter) with the V-Cut system. Within a minute the bale nets and bindings are cut, removed and stored.

Exclusivity: the patented walking triple floor is activated by hydraulic motors.

Convenience: optimized weight (close to the headstock), optimized visibility and offset.

Reliability: directly driven by a hydraulic motor (no control box). Bolted blades on the turbine.
