

JFC Water Troughs

£POA

An extensive range of water troughs suitable for all applications. JFC polyethylene troughs are tough, impact resistant and designed to withstand heavy use. Each trough is stable in UV light and has a high freeze/thaw cracking resistance making them suitable for indoor and outdoor applications. We offer an extensive range of innovative troughs available in a variety of shapes and sizes (50 - 2,000L) that are easy to transport, install and service. All JFC troughs are fitted with valves but can be purchased without the valve on request.
